

Stucco d'Raffinato

100% Acrylic, Interior and Exterior Finish

Rustic Realism. Easily Applied.

LaHabra

Capture the Look of Old World Plaster, Rock or

Create a Look That is Unique.

From the old-world look of Italian marble to the new-world look of California stucco, Stucco d' Raffinato is the product that can give you the look you desire. The beautiful finish of Stucco d' Raffinato is limited only by your imagination and the craftsman's workmanship. This is another product in the LaHabra Select Finish line which offers endless design possibilities.

Create an infinite variety of colors and textures

Texture it Beautifully, Then Add Color.

LaHabra Stucco d' Raffinato is a highly durable, 100% acrylic, interior and exterior decorative finish. Extremely versatile, it can easily be used to capture the authentic look and feel of Old World Plaster or simulate the appearance of rock or stone over a wide range of substrates. With almost endless possibilities for combining color and texture, it's simple to satisfy a diversity of design requirements or integrate Stucco d' Raffinato with an existing décor.

Unlike faux painting, Stucco d' Raffinato combines color and texture to give walls a dimensional quality.

- Suitable substrates include flat concrete, stucco, masonry, high-quality plaster and gypsum board.
- Stucco d' Raffinato comes in convenient, premixed 1 or 5 gallon pails, ready to be applied by trowel or spatula.
- Color can be added by tinting, staining, glazing, stenciling or a combination of these.
- Using a variety of tools and technique, textures can be created ranging from smooth and polished to rustic or heavy raised relief.
- Stucco d' Raffinato dries to an extremely hard, flexible finish that's breathable and resists shrinking and cracks.

Stone.

These colors may vary depending on texture and application technique. For color verification, a sample in the color and texture should be made prior to ordering material. The contractor should provide a jobsite color sample prior to application.

Old world charm is easily created.

LaHabra Select Finishes are high-quality products that provide a truly unique

appearance for interior and exterior applications. Because the effects they achieve are dependent on using specialized techniques, applicators are required to attend a product education seminar before installation.

LaHabra Stucco d’Raffinato Finish

Description

A durable 100% acrylic finish that can be used to create an almost endless variety of textured looks for interior and exterior walls ranging from smooth to heavy raised relief or made to resemble surfaces that include rustic stone or the appearance of an Old World Plaster finish.

Uses

Applied over properly prepared substrates that include flat concrete, stucco, masonry, high-quality plaster and interior gypsum board bases.

Advantages

- Easy to achieve texture effects
- Tintable to almost any color
- Suitable for interior or exterior applications
- Can be used with LaHabra Antiquing Gel

Packaging

1 and 5 gallon pails

Coverage

150 square feet per 5 gallon pail *

*Depending on texture, coverage may vary.

Colors and Textures

Stucco d’Raffinato can produce a multitude of textures and is available in unlimited colors.

Surface Preparation

1. Surfaces must not be exposed to temperatures below 40° F for a 24-hour period prior to finish application.
2. If used, a base coat must cure a minimum of 24 hours before applying Stucco d’Raffinato. (Note: Curing time may be longer in cool and/or humid climates)
3. Surfaces must be unpainted, clean, dry, structurally sound and free from efflorescence, grease, oil, form release agents and curing compounds.
4. Cure concrete at least 28 days before applying Stucco d’Raffinato. If curing compounds or form release agents are still present on the surface, wash it thoroughly with muriatic acid and then flush it to remove residual acids.
5. Skim coat masonry surfaces with the joints struck flush, using a base coat to produce a smooth, level surface and allow it to cure at least 24 hours before applying Stucco d’Raffinato.
6. Clean and level existing brick to form a smooth surface and allow it to cure for 24 hours before applying Stucco d’Raffinato.
7. Interior drywall should be finished to a Level 3 finish.

Mixing

Although LaHabra Stucco d’Raffinato comes premixed, it is recommended that you stir it prior to application as the aggregate tends to settle during storage.

Application

LaHabra requires that all applicators attend an educational seminar on LaHabra Select Finishes. LaHabra recommends that the project owner or designer approve a job site mock-up of the application of this product. The mock-up should demonstrate the products’ appearance under the conditions given by the project specification(s).

1. A variety of application tools and techniques can be used, however, the most common involve the use of a metal trowel and spatula.
2. To apply Stucco d’Raffinato, use a stainless steel trowel to lay down a coat slightly thicker than 1/16”. Texture can be created by dragging the trowel or other tool(s).
3. Allow the surface to dry for 15 minutes. Then using moderate pressure, use a plastic float to smooth out some of the heavy texture.
4. Texture can be created – as well as designs – by using various tools.
5. Allow the surface to dry completely.
6. At this stage, an Old World Plaster finish can be created by glazing and/or staining the product.

Clean Up

Clean tools frequently using clean water.

Maintenance

LaHabra Stucco d’Raffinato can be cleaned with a soap and water solution followed by a warm water rinse. Do not use harsh or abrasive cleaners.

Storage and Handling

Transport and store Stucco d’Raffinato in closed, undamaged containers. DO NOT ALLOW TO FREEZE.

Shelf Life

If the product remains in an unopened, undamaged, original sealed pail that is properly transported and stored, Stucco d’Raffinato has a shelf life of up to 1 year.

Cautions and Limitations

Recommended for structurally sound, clean, smooth substrates. In case of contact with eyes, flush with clean water and seek medical attention if irritation persists. Use only when surface and air temperatures are above 40°F (4°C) during application and drying time. Do not allow to freeze until completely dry.

Product Data Sheet: This information is designed to guide you and has been conscientiously compiled according to the latest state of our technology. No liability can be accepted in connection with the use of the product because of the great variety of applications and working conditions.
